

REMEDI

**A Smart Donation & Recycling
Platform for Medicines**

Introduction

problem statement

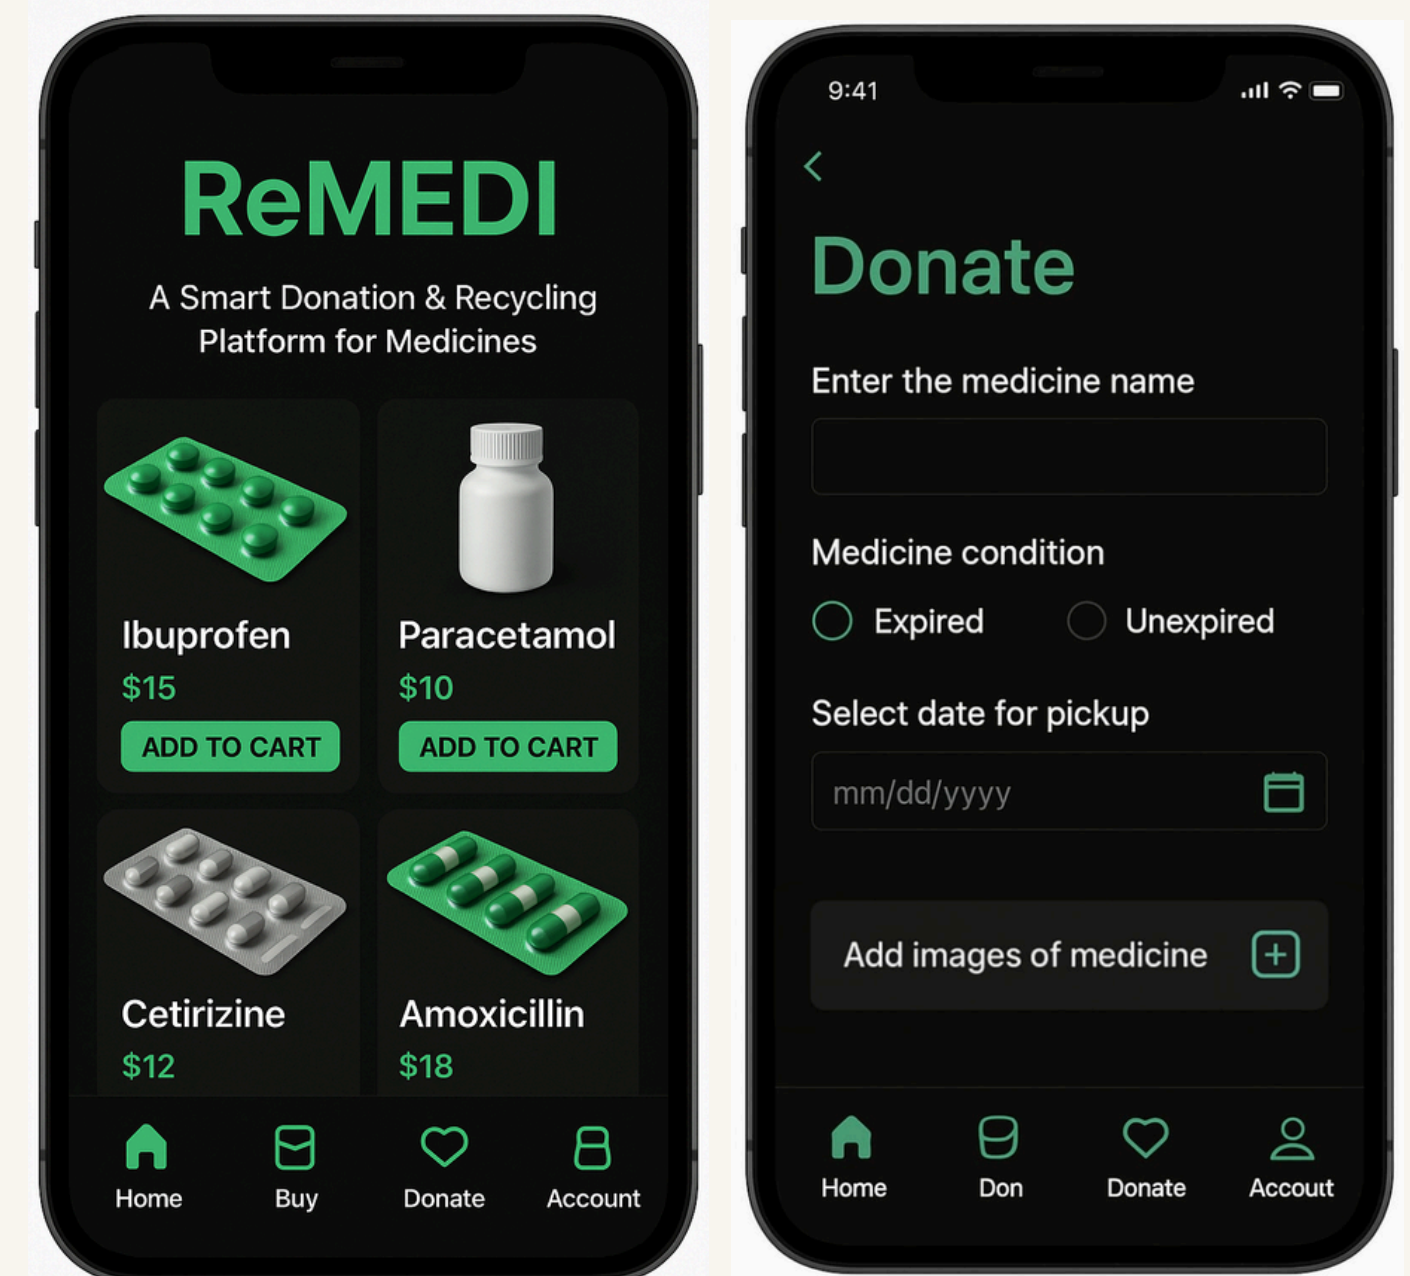

- Many people throw away unused or expired medicines, which harms the environment and wastes resources.
- At the same time, many people cannot afford expensive medicines.
- There is no proper platform for the safe donation, recycling, or reuse of medicines.

ReMEDI

solution

- ReMEDI is an app designed to reduce medicine waste and establish a useful cycle.
- It connects donors, recipients, and industries on a single platform.
- The platform works both online and offline to reach a wider audience.
- Users are motivated to donate through discount coupons and monthly medicine packages.

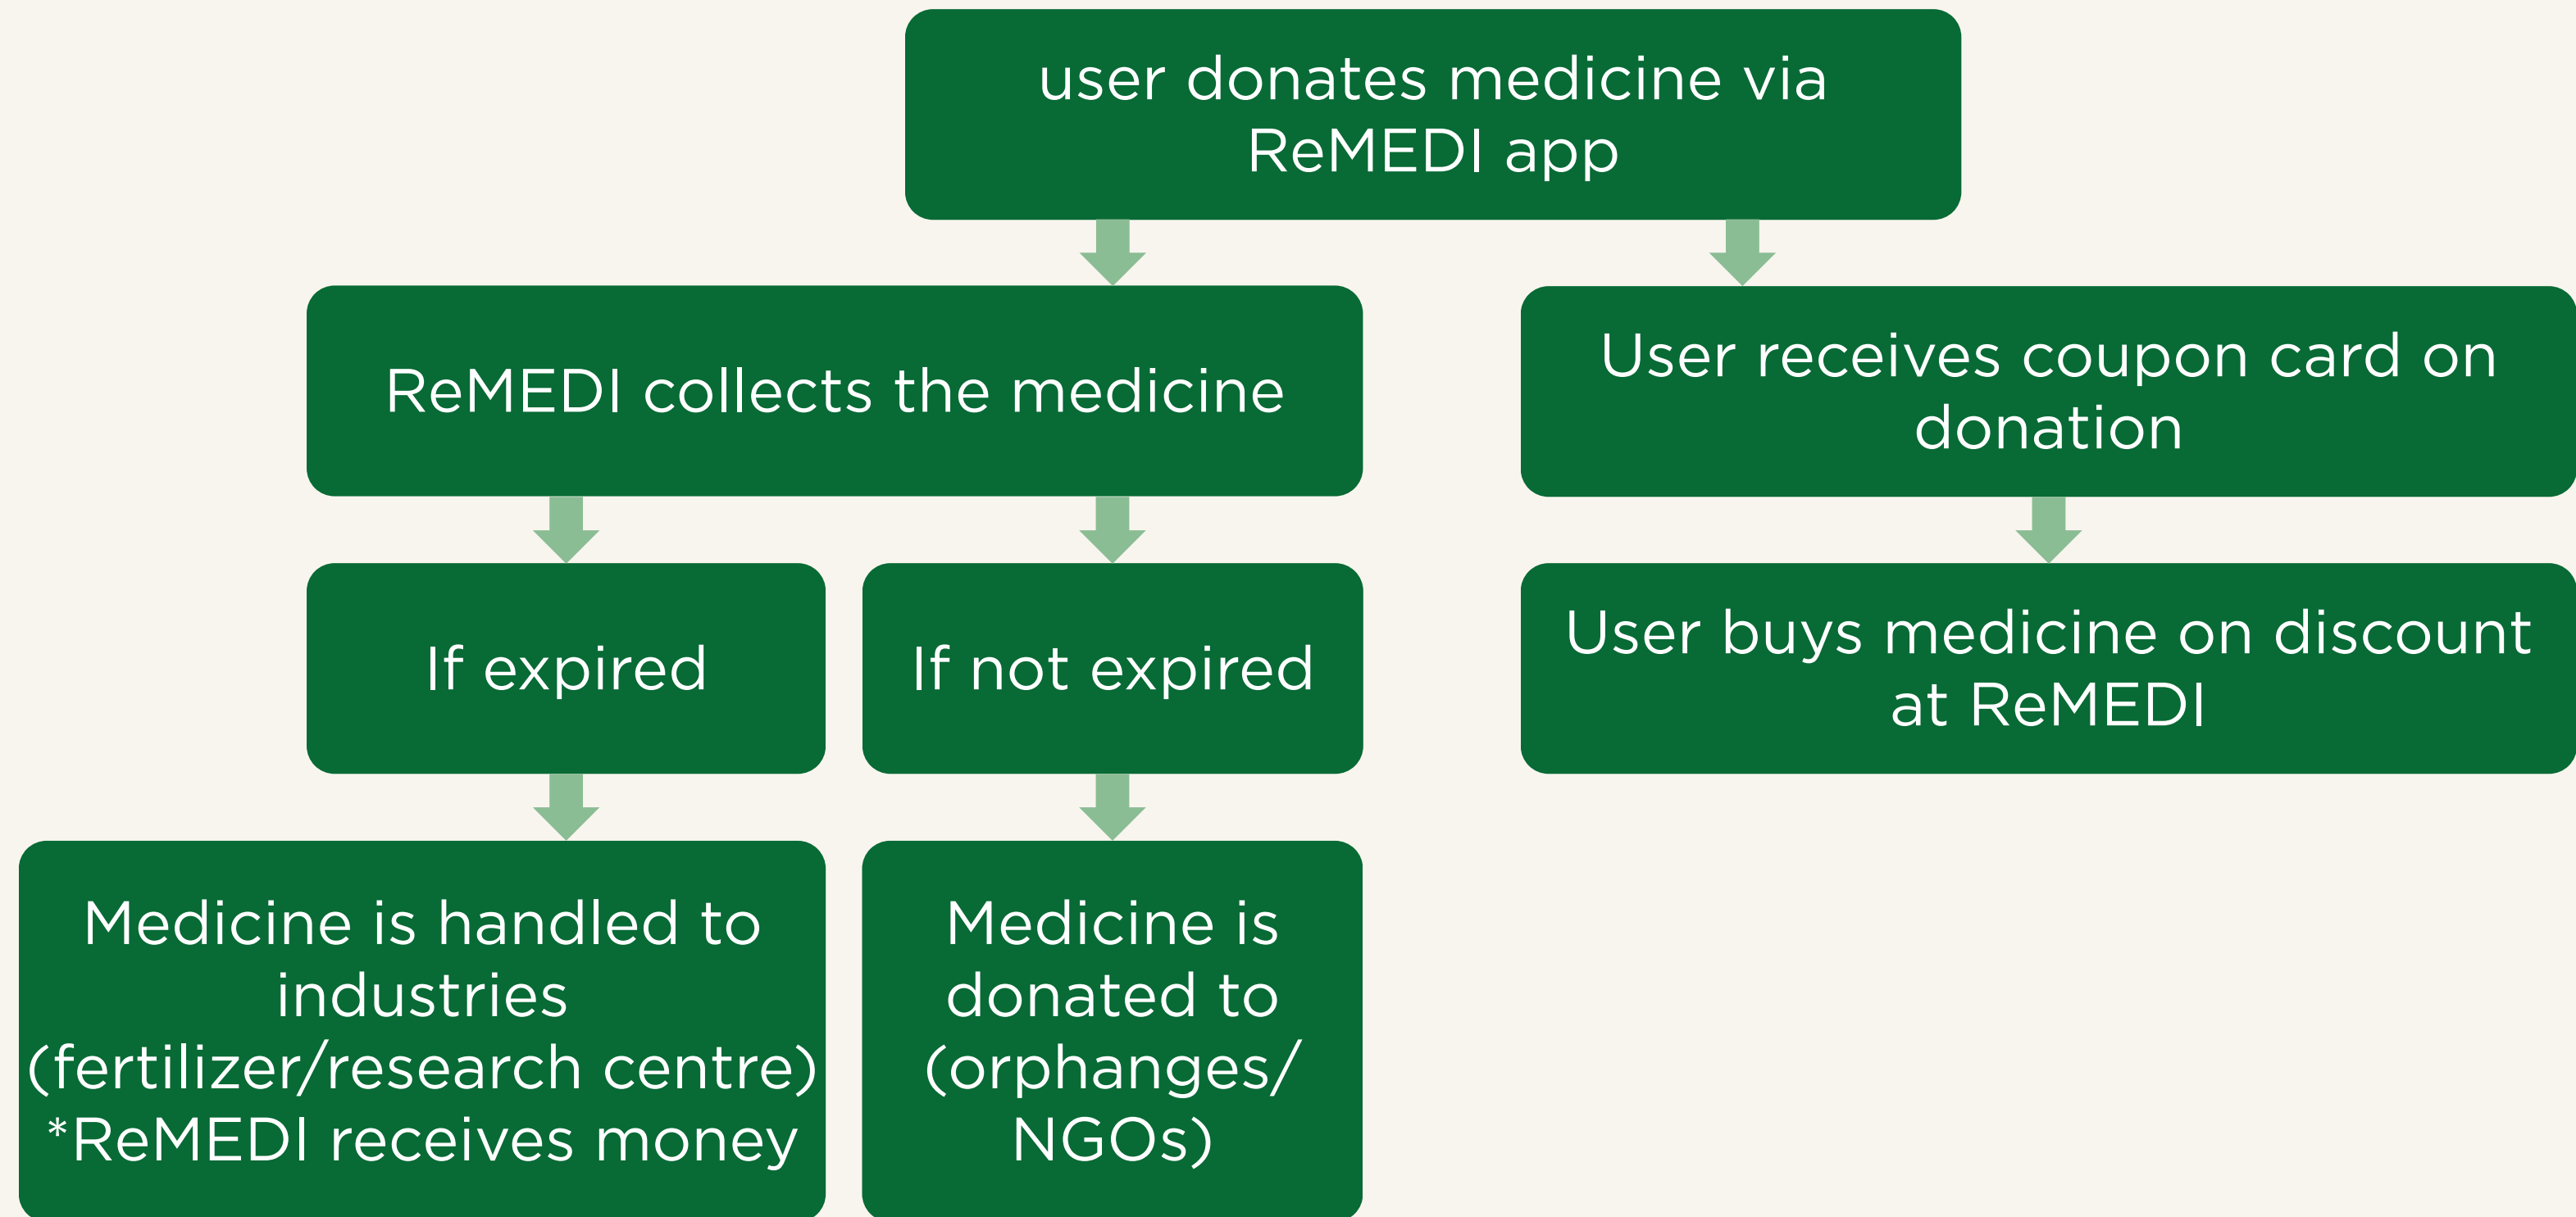

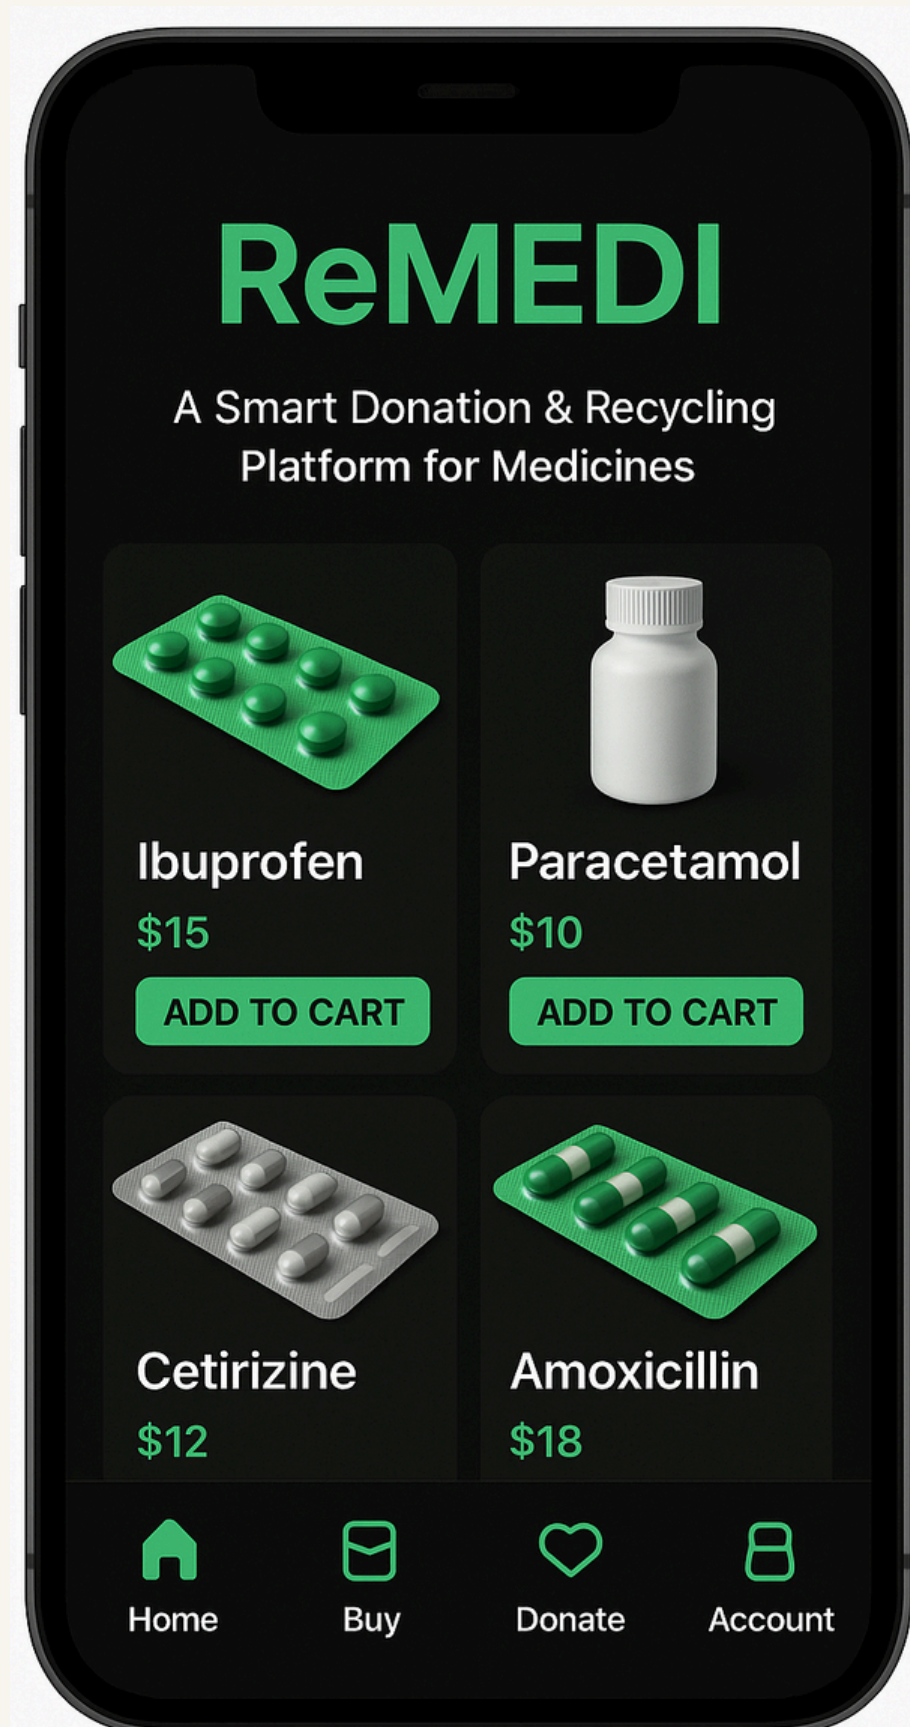

Objective

- Reduce medicine waste.
- Provide low-cost medicines to users.
- Support NGOs and orphanages with donated medicines.
- Give expired medicines to fertilizer/research centers.
- Reward users with coupons to encourage donations.
- Promote sustainable development.

Block Diagram

Product Specification

- App with a donation option.
- Coupon card system.
- Online and offline access.
- Package subscriptions with reminders.
- Local delivery system.
- Price discounts and monthly offers.

Beneficial to society

- Helps people in poverty get access to medicine.
- Supports NGOs and orphanages.
- Reduces waste and pollution.
- Educates users on proper disposal.
- Saves money for everyone involved.

Newness/uniqueness

ReMEDI is unique due to its coupon-based reward system for donations, safe reuse, and its handling of expired medicines.

The platform's offline functionality makes it useful for rural areas.

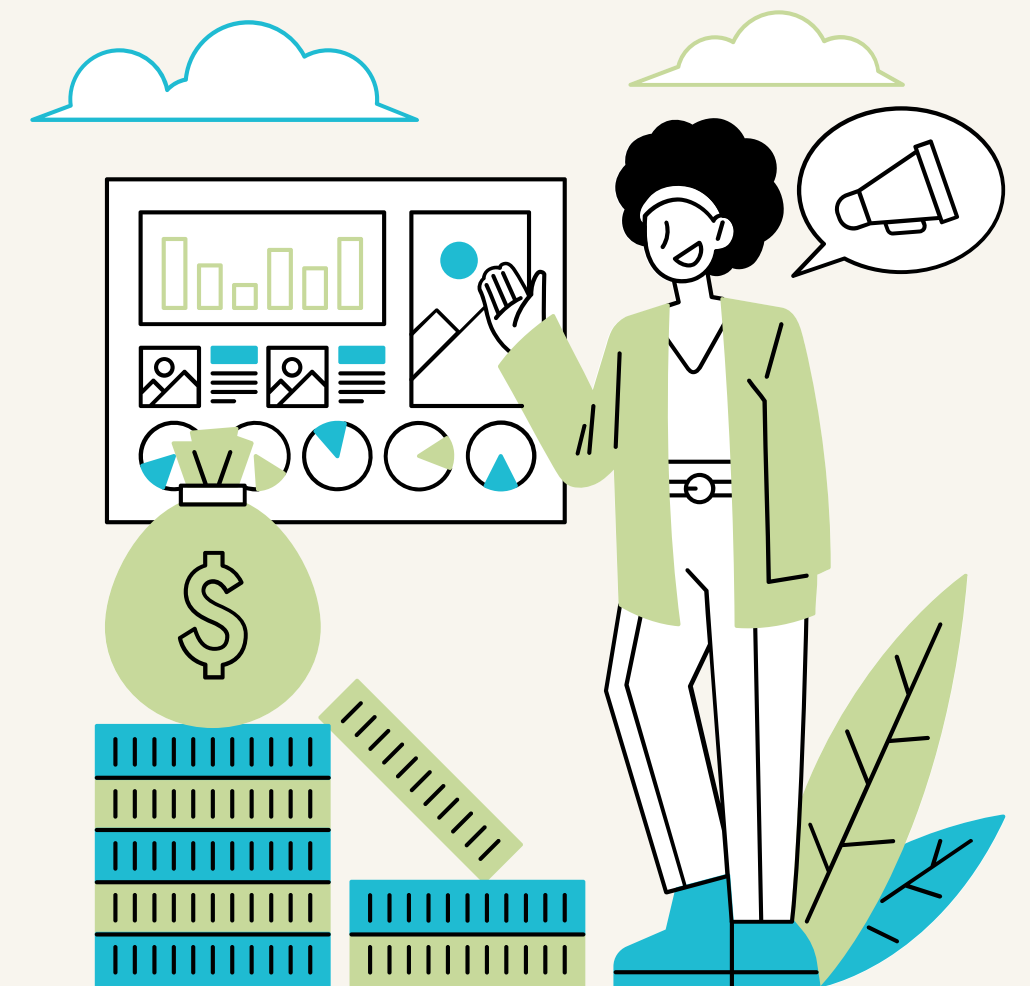

No other platform offers all of these services together.

Financial plan

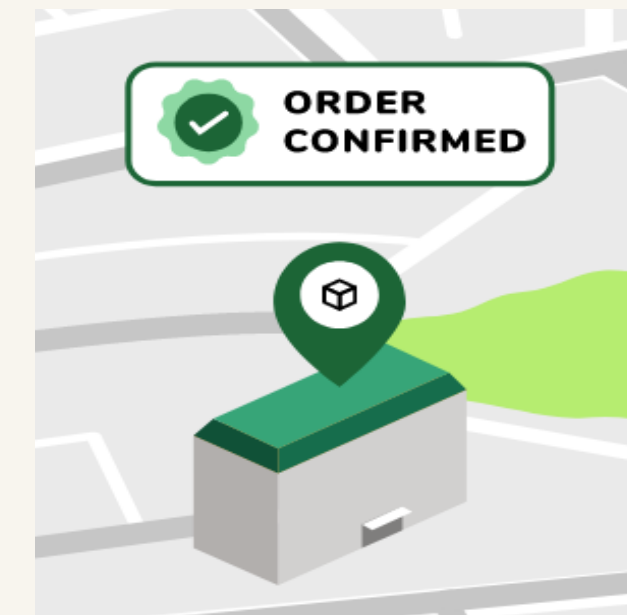

Example (based on one medicine):

- **ReMEDI** buys a medicine for **Rs. 100**, ***sells*** it for **Rs. 115** (after a Rs. 10 discount), and earns **Rs. 15** from expired medicine sent to an industry. This results in a profit of **Rs. 30** per unit.
- Monthly Estimation (100 units/day):
- **Revenue:** Rs. 390,000
- **Worker Salary:** Rs. 50,000 (for two workers)
- **Net Profit/month: Rs. 40,000**
- ***ReMEDI will also earn from app downloads, advertisements, and future industry deals.***

Conclusion

- ReMEDI is a smart app for donating and recycling medicines that addresses a significant problem in healthcare.
- It provides an innovative solution by connecting donors, those in need, and industries on one platform.
- By encouraging donations, providing affordable healthcare, and managing waste, ReMEDI creates a sustainable and beneficial cycle for everyone involved.

THANK YOU
